

Please don't implement any proposal that would lessen the protection of the Indiana Telephone Privacy Law. It has been so much better to not be receiving unwanted solicitations at all hours of the day and night. We used to receive calls from 8 am to after 9 at night, and even on weekends. After working all day, I did not appreciate having unsolicited calls in the evening, and on my day off, I was tired of answering 3 or 4 calls during the day that I did not want.

The Indiana law has made it much more peaceful at home and I implor you to not make Federal restrictions which are looser and would override our own law!  
Thanks you.
